SKILLS

Backend

Java · Spring Boot · PHP · Symfony · Laravel · Kafka

Frontend / Mobile

JavaScript · React · Next.js · Flutter (Dart)

Data

Oracle · PostgreSQL · MongoDB · Redis · MariaDB · MySQL

DevOps / Tools

Docker · Git · Jenkins · Jira

Architecture & quality

Microservices · Hexagonal · DDD · Clean Code · SOLID · JUnit · Mockito

EDUCATION

Higher Technician in Application Development

CFP Daniel Castelao, Vigo · 2006

LANGUAGES

Spanish (native)

Galician (native)

English — B1

ABOUT ME

Software developer with 17 years of experience, specialized in Java (Spring Boot) backend systems and microservice architectures built with Hexagonal Architecture and DDD. Tech Lead at Mercadona: I combine hands-on development with sprint planning, mentoring and code review. Full-stack background that understands the system end to end, from requirements to deployment. Open to new opportunities and freelance projects.

EXPERIENCE

Senior Back-End Developer & Tech Lead

2023 — Present

Mercadona · Vigo

- Active development and evolution of an architecture of close to 15 microservices (Java, Spring Boot) with Hexagonal Architecture and DDD; asynchronous communication between services with Kafka.
- Tech Lead for a team of 3, alongside 4 more developers: sprint planning, task assignment and ongoing mentoring.
- Review of 10-15 merge requests daily, driving Clean Code and SOLID practices.
- Database optimization (MongoDB, Redis, Oracle, PostgreSQL): indexing, partitioning and data migrations.
- Unit (JUnit, Mockito) and integration testing, with a minimum 80% coverage across the full API flow.

Full-Stack Web Developer

2008 — 2023

Ayco Internet · Vigo

- Full-stack development (Spring Boot, PHP, JavaScript, HTML, CSS) and mobile (Flutter) for a broad client portfolio.
- Technical leadership of projects: requirements gathering with clients and management of the full lifecycle, from requirements to deployment.
- E-commerce, landing pages, admin panels, intranets, logistics management systems and REST APIs.
- Design and maintenance of relational and NoSQL databases (MySQL, SQL Server, Firestore).

PROJECTS

Blanwi · Technical co-founder · blanwi.com

Social network for rediscovering photo memories. Flutter app, Symfony backend and Next.js website; live on Google Play (closed beta).

Ambisousa · Co-developer · ambisousa.nunosousa.pt

Institutional website with its own content management (Next.js + Spring Boot), in production.

In development: Opticamp (multi-tenant SaaS for campsites, Laravel) and Project Vanguard (multiplayer browser game, Java 25 and Spring Modulith).
